

**Remarks**

Entry of the above-noted amendment, reconsideration of the application, and allowance of all claims pending are respectfully requested. By this amendment, claims 11-12 correct typographical errors. Support for the amendment can be found throughout the specification, drawings, and claims and thus, no new matter has been added. Claims 1 and 3-30 are pending.

Claims 11-12 originally presented an  $m \times n$  sensor array. Claims 11-12 were not amended, however because of a font problem when printing, the claims presented an  $m \times n$  sensor array in the Response to Office Action filed August 25, 2003. Thus, this amendment serves to correctly present an  $m \times n$  sensor array in claims 11-12.

In view of the above amendments and remarks, allowance of all claims pending herein is respectfully requested. If a telephone conference would be of assistance in advancing the prosecution of this application, the Examiner is invited to call appellants' attorney at the below-indicated telephone number to arrange for an interview.

Respectfully submitted,

Robert J. Brill  
Attorney for Appellants  
Reg. No. 36,760
